

## Annexure-A

**Extended Producer Responsibility Plan****(General Scheme of Collection)**

As part of Extended Producer Responsibility (EPR) plan we will implement the following:

1. **Product Exchange Scheme:** Under the Product Exchange Scheme, the Company undertake to launch Exchange Scheme to the consumers to bring any Air-Conditioner & Washing Machine of any make and take new AC/Washing Machine. Under the scheme the Company will decide the Exchange price at the time of launching the scheme.

The exchange scheme shall be implemented through our network of dealers and service centers and the equipment so collected shall be recycled through E-Parisaraa (P) Ltd. or any other authorized recycler as we may decide from time to time.

But since, we have started selling Air Conditioners in Feb, 2012 and Washing Machines in the last quarter of 2015. Hence, as per the target fixed under EPR our collection target for Air-Conditioners would become applicable in 2021-22 and for Washing Machines the collection target would become applicable from 2025-26. Therefore, at present it will be a futile exercise for us to identify the dealers and service centers for the purposes of E-Waste collection. Hence, all decisions and steps with regard to the tie-up with dealers and service centers for the purposes of the collection scheme will be taken at the relevant time when the collection target becomes applicable on us i.e, sometime around the year 2021.

2. **Buy Back Scheme:** We have tied up with an authorized recycler M/s. E-Parisaraa (P) Ltd. for implementing the buy-back scheme. Under this scheme we have a system in place to collect end of life products from customer's door step. For this purpose we have 2 toll free number 18003011111 (for Carrier brand) and 18003000011 (for Midea brand) where the customers can call and register their request for disposing of their old electronic equipment. Once a request for recycling is received at the said number, the representative(s) of E-Parisaraa (P) Ltd goes to the caller's location/premises and pick up the discarded electronic equipment after paying the recycling amount to the customer. In this manner the customers are saved the drudgery to carry/transport bulky electronic equipment for disposal.
3. **Collection through service centers and dealers:** We have also educated and sensitized our service centers and sales and service dealers to collect end of life electronic equipment and defective spare parts from customers so that they can be disposed in an environment friendly manner through an authorized recycler. Consequently, all defective equipment and spare parts are brought to our service centers and thereafter, they are either reused (wherever feasible) or recycled through the recycler.

**Details of Proposed awareness programmes**

We will take the following initiatives for creating consumer awareness:

1. We will include e-waste content in our product ads (print and/or media);
2. We will send SMS to our customers from time to time to educate and encourage them to exchange their old electronic equipment under our exchange scheme;
3. We will use our customer care call center to educate the customers. We will also play voice message and educate the customers who called our customer helpline.
4. In our user manuals there is a separate page on e-waste where all do's and don'ts are mentioned to educate our customers. We have also mentioned the toll free number where the customers can call and register their request for disposal of e-waste;
5. We have also created a separate page on e-waste in our website; *provide link*
6. We will also educate our dealers and ASPs on e-waste so that can in turn create awareness amongst the consumers and encourage them to dispose of their old electronic equipment through proper channels;
7. We have also taken steps to give information pertaining to e-waste on our product cartons;

**Estimated budget for Extended Producer Responsibility and allied initiatives to create consumer awareness.**

1. Awareness:
  - a) The cost of product print Advertisements – Rs. 5,00,000/- per annum approximately.
  - b) The cost of awareness programmes held during dealer meets and service channels meet pan India.
  - c) E-waste awareness through sms- Rs.40,000/- approximately.
2. Collection Centres: Rs.160,000/- (as rent and maintenance cost for e-waste collection area pan India)
3. PROs: NA
4. Channelisation (including cost of reverse logistics): Nil
5. Recyclers / Dismantlers: Nil
6. ROHS testing: Rs.10,00,000 per annum (RoHS testing machine installed inhouse)
7. Any other schemes: Nil
